KEY PERFORMANCE INDICATORS

Planning Phase:

1. Ability to accurately estimate project costs, timelines, and resource requirements.
2. Efficiency in creating project plans, including developing schedules, identifying critical paths, and establishing milestones.
3. Performance during internal and external audits, including compliance with document control procedures, accurate documentation, and timely response to audit findings especially in relation to ISO 9001:2015 and ISO 45001:2015.

Pre-construction Phase:

1. Percentage of successful bids secured by the planner, indicating their ability to effectively develop competitive proposals.
2. Ability to identify and mitigate potential risks during the pre-construction phase, such as identifying environmental risks or negotiating favorable contracts.
3. Performance during internal and external audits, including compliance with document control procedures, accurate documentation, and timely response to audit findings especially in relation to ISO 9001:2015 and ISO 45001:2015.

Construction Phase:

1. Effectiveness in managing project costs, including budgeting, tracking expenses, and minimizing cost overruns.
2. Performance during internal and external audits, including compliance with document control procedures, accurate documentation, and timely response to audit findings especially in relation to ISO 9001:2015 and ISO 45001:2015.

Post-construction Phase:

1. Client feedback and satisfaction with the completed project, assessing the planner's ability to meet client expectations.
2. Performance during internal and external audits, including compliance with document control procedures, accurate documentation, and timely response to audit findings especially in relation to ISO 9001:2015 and ISO 45001:2015.

QUALIFICATION AND COMPETENCY REQUIREMENTS

MINIMUM EDUCATION and EXPERIENCE

1. Must possess a bachelor's degree in civil engineering.
2. Must be a licensed engineer.
3. Preferably 10-15 years of experience as a Project Planner.
4. Must be proficient in Primavera P6, Microsoft Project, and other scheduling tools.

KNOWLEDGE

1. Understanding of construction practices, processes, and methodologies.
2. Knowledge of project management principles, techniques, and tools.
