

Safe Projects. Stronger Businesses.

A safe project protects more than workers—it protects timelines, budgets, brand reputation, and long-term asset value.

WHAT WE DO

EHS Planning & Compliance Management

- Project-specific Construction Safety and Health Program development
- Regulatory compliance support and documentation
- Contractor prequalification and safety evaluation
- Permit coordination and statutory reporting support

Site Safety Supervision & Monitoring

- Deployment of qualified Safety Officers
- Routine site inspections and compliance audits
- Hazard identification and corrective action tracking
- Incident investigation and reporting

Risk Management & Governance

- Project risk assessments and mitigation planning
- Toolbox meetings and safety orientation and training programs
- Contractor safety performance monitoring
- Digital reporting and structured documentation

Environmental Compliance Support

- Monitoring of environmental management plans
- Waste management and site environmental controls
- Coordination with regulatory bodies where required
- Deployment of qualified Pollution Control Officers

ENGAGEMENT MODELS

**EHS personnel
deployment embedded
within project teams**

**Owner's EHS
representation
and oversight**

**Project-based
compliance audits
and safety validation**

**Multi-site program
safety governance**

**Pre-construction safety
planning and risk
assessment advisory**

Proactive Safety Leadership. Structured Risk Control.

Construction risk is not optional. It must be managed with discipline, visibility, and accountability.

JCVA Environment, Health & Safety Consultancy provides structured safety leadership across the full project lifecycle. We embed safety governance into planning, procurement, and construction execution, ensuring regulatory compliance while protecting people, assets, and reputation.

As part of the JCVA platform, our EHS team works alongside project managers, engineers, and contractors to create safe, compliant, and performance-driven job sites.

Safety is not a checklist. It is leadership in action.

WHO WE WORK WITH

Whether supporting ground-up developments or fast-track interior fit-outs, JCVA's EHS services integrate seamlessly into broader project management frameworks.

Developers and asset owners seeking structured safety oversight.

Corporate occupiers requiring compliant, well-managed fit-out environments.

Contractors and project teams that value disciplined governance and incident prevention.

Institutions delivering healthcare, industrial, logistics, commercial, and high-risk facilities.

WHY JCVA? A consultancy built on expertise, partnership, and accountability.

Hands-on, accessible leadership

Strong project controls and reporting

Technology-enabled visibility and decision-making

Responsive, people-driven consultancy

Flexible, end-to-end service delivery

TRUSTED BY MARKET LEADERS

220+ clients across commercial, industrial, institutional, and consumer sectors.
